70078-0179

### REMARKS

By the present amendment, new claims 12 and 13 have been added to give Applicants more complete protection for their invention. In particular, the primary and supplementary filter canisters are said to be elliptical in shape. Support for these amendments is found in the drawings and in particular in FIGS. 1, 11, and 12 as filed and the description of these drawings. No new matter has been added by these amendments. An action on the merits is requested.

Respectfully submitted,

Andrew Capon et al.
